**HERBERGER THEATER FEATURES
JOAN C. THOMPSON IN CURATOR ART EXHIBIT**

PHOENIX – The Herberger Theater Center’s first art gallery exhibit of the 2009-10 season showcases the work of former Herberger Theater Art Gallery Curator, Joan C. Thompson.

The “Range of Motion” exhibit is on display September 10-27, 2009. Opening is Thursday, September 10, 5:30-7pm. Artwork is available for purchase with a portion of the proceeds benefiting the Herberger Theater Center.

The exhibit focuses on the physical possibilities and range of configuration in recording humans and their activity. Gravitational pull, defiance of gravity and persistence of existence, while not always representational, are always considered. Humans provide the best inspiration for mechanical devices, which often replicate body parts in an uncanny way, creating endless possibility for crafting design.

The Herberger Theater Center is a non-profit organization whose mission is to support and foster the growth of the performing arts in Phoenix as the premier performance venue, incubator and advocate.

For more information, visit www.herbergertheater.org or call 602.254.7399.
